To Whom It May Concern:

ICOM Mechanical...professional and doing it right.

ICOM Mechanical has been serving AP Tech since the mid 90s. We sent the first project out to bid to various companies. ICOM's presentation was simple yet concise. They presented solutions. Ever since then ICOM Mechanical has been our choice for Cleanrooms, equipment installation and maintenance. We have found all of ICOM's personnel, from office staff to field tech's to be professional, knowledgeable and willing to take on all the challenges we have presented. ICOM's response to emergency situations when down time is critical is especially impressive.

Best Regards,
